Frequently Asked Questions

Answers to common questions

Unanswered Questions

If you have a question that is not answered here, please let me know by sending me an e-mail to tobias.cors@haw-hamburg.de or by creating an issue on GitHub.

Contribution and Mistakes

If you have found a mistake in the course material or if you have any suggestion on how to improve the course, please let me know in the following form or by creating an issue on GitHub.

FAQs

Is the course difficult?

In terms of difficulty, this is of course somehow complicated for me to assess. However, I have tried to make all the content as comprehensible as possible and really do ask you many questions in the lectures. If I have the impression that something has not been understood at all, then I take longer at that point. This semester is the first time I think the course is truly finished. I have adapted the slides based on feedback from the last two years and made all the examples as simple as possible. **In a nutshell**: If you are interested in the subject and equations do not scare you, you will likely do great in the course.

How can I download PDF slides from the lecture?

You have two options:

Option 1: Download from Github

- Follow this link to the PDF slides on Github.

Option 2: Generate yourself

1. First, open the lecture you want to download the slides from.
2. Then, click on the `RevealJS` button in the top right corner.
3. Now, click on the three stacked bars in the lower left corner.
4. Then, click on `Tools` in the upper left corner.
5. Now you can select `PDF Export Mode` and then save the slides as a PDF.

> Unfortunately, this method does not work perfectly on all browsers. If you have a Chrome based browser, you should be fine.

How does the calculation of the bonus points work?

To reach the full 6 points, all exercises must be submitted. A maximum of 0.5 points can be earned per exercise. In the overview, '1' stands for successfully submitted, and '0.5' for submitted (but without attempting to solve everything). In the end, I calculate this as half or quarter points towards the total score.
